It's all about you!

We know everyone's path to employment is unique. School Leaver Employment Supports (SLES) are capacity building supports designed to assist your transition from school to employment. Our dedicated SLES team is here to support you in building your confidence and independence – every step of the way.

What is SLES?

SLES is a dedicated program for school leavers, designed to equip you with the skills or practical experiences you need to thrive in the workplace.

PLUS! When you are ready to enter the workforce but could benefit from guidance to map out your career goals or study plans, our dedicated team is here to provide personalised coaching and expert advice designed specifically for your ambitions and aspirations!

SLES activities are designed for you!

If SLES funding has been approved, school leavers can attend in person at our Career Centres. Here, you can engage in one-on-one sessions with your Career Coach, participate in small group activities, or mix and match these options to enhance your communication and life skills.

We can connect you to work experience opportunities!

We encourage hands-on 'try and test' opportunities through work experiences. Our goal is to connect you with local businesses for work experience or job opportunities. By participating in these opportunities and visiting different worksites, you'll gain firsthand insights into different work environments, helping you discover your preferences and strengths. This experience is designed to enhance both your hard and soft skill development, building your capacity for future success.

Supporting you... every day!

That's what we want for you! Your support worker can accompany you to your workplace until you feel ready to go solo. They can also travel with you on public transport to help you establish your routine.

We understand that everyone learns differently and our experienced team is here to provide personalised support, allowing you to learn at your own pace.

SLES SUPPORTS ARE DESIGNED JUST FOR YOU!
